## GLENVIEW

### THIS WEEK

The median single family home price in GLENVIEW this week is \$634,000. The 500 homes have been on the market for an average of 248 days.

With inventory trending up but days-on-market trending down and the Market Action Index essentially flat recently, conditions don't seem to have strong up or down pull.

### QUARTILES

To get a tightly targeted understanding of homes in the market, we break each locale into quartiles. Each quartile is 25% of the homes listed.

Most expensive 25% of homes

Upper-middle 25% of homes

Lower-middle 25% of homes

Least expensive 25% of homes

We'll refer to the quartiles in the trend graphs below.

### PRICE

The market has been on a downward trend recently and this week, while essentially flat, doesn't break us out of that cycle.

### QUARTILE PRICES

Often, we find insights by watching pricing trends within the quartile segments.

Price weakness is visible almost across the board. Prices in Quartile 4 have been mixed recently, while the rest of the market is trending downward. Look to a strong, persistent up shift in the Market Action Index as a leading indicator of the trough in the market.

## PRICE AND VALUE

While prices have been basically flat, the price per square foot has been heading downward. While not a sign of broad strength in a market, larger homes are coming more available and buyers are tending to get more home for their money.

## INVENTORY

Inventory has been climbing lately. Note that rising inventory alone does not signal a weakening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is keeping up with available supply.

Residential house prices are a function of supply and demand, and market conditions can be characterized by analyzing those factors. Watch this index for sustained changes: if the index falls into the Buyer's Market zone for a long period, prices are likely in for a downward correction.

The Market Action Index (MAI) illustrates the balance between supply and demand using a statistical function of the current rate of sale versus current inventory.

An MAI value greater than 30 typically indicates a "Seller's Market" (a.k.a. "Hot Market") because demand is high enough to quickly gobble up available supply. A hot market will typically cause prices to rise. MAI values below 30 indicate a "Buyer's Market" (a.k.a. "Cold Market") where the inventory of already-listed homes is sufficient to last several months at the current rate of sales. A cold market will typically cause prices to fall.

### MARKET ACTION INDEX

The GLENVIEW market is currently quite strongly in the Buyer's Market zone (below 30). The 90-day Market Action Index stands at 9. With several months of inventory available at the current sales rate, buyers should find ample choice.

The market has shown some evidence of slowing recently. Both prices and inventory levels are relatively unchanged in recent weeks. Watch the Market Action Index for changes as it can be a leading indicator for price changes.

The quartiles can help you answer the question, "How hot is the market for homes in my price range?"

### MARKET ACTION

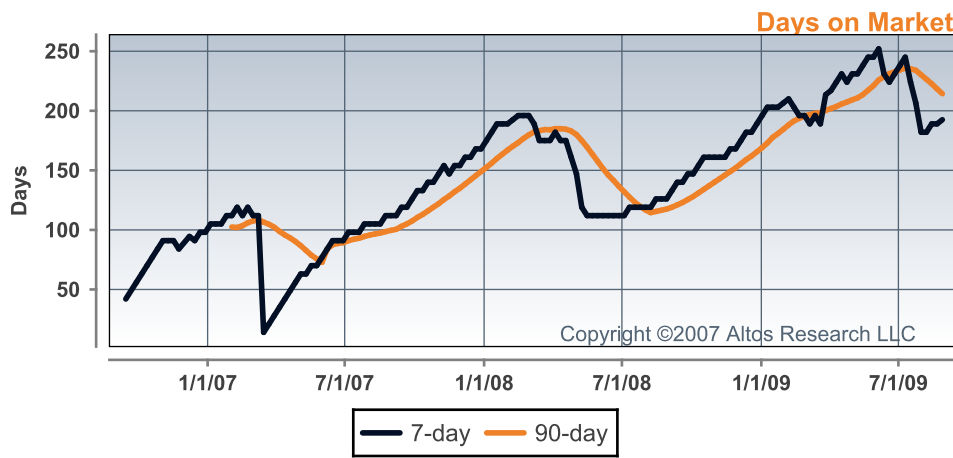

Not surprisingly given the overall Market Action Index, all quartiles are in the Buyer's Market zone with several months of inventory given the current rate of demand for homes in the quartile. Watch the quartile for changes before the overall market shifts. Often one end of the market (e.g. the low end) will improve and signal a strengthening market before the whole group changes.

### DAYS ON MARKET (DOM)

The properties have been on the market for an average of 248 days. Half of the listings have come newly on the market in the past 192 or so days.

### DOM PER QUARTILE

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.

### THIS WEEK

The median single family home price in GLENVIEW 60026 this week is \$829,000.

Inventory has been tightening and days-on-market decreasing recently. The Market Action Index has been basically flat, not providing strong indication for market conditions.

### PRICE

Again this week in this zip code we see a downward notch for prices. Pricing has been weak in recent weeks and versus their absolute-high level. At this point, we will be looking for a persistent upward shift in the Market Action Index as a leading indicator for a trough in prices.

### Median Single Family Home Price by Quartile

### PRICE PER QUARTILE

In the quartile market segments, we see that this zip code isn't showing much strong directional indication lately. Quartiles 1 and 4 are up while Quartiles 2 and 3 are down in recent weeks. Watch for persistent shifts in the Market Action Index for a leading indicator of stronger price moves in the market as a whole.

### Characteristics per Quartile

Quart	Median Price	Med. Sqft	Med. Lot Size	Bed	Bath	Med. Age	Inven.	New	Ab-sorbed	Avg. DoM

### Price per Square Foot

### PRICE AND VALUE

Despite recently falling prices, the price per square foot has stayed reasonably flat. This implies that there's a portion of the market being priced at a premium. You can investigate this condition in the quartile details.

### INVENTORY

Inventory has been climbing lately with 55 properties available this week. Note that rising inventory alone does not signal a weakening market. Look to the Market Action Index to gauge whether buyer interest is keeping up with available supply.

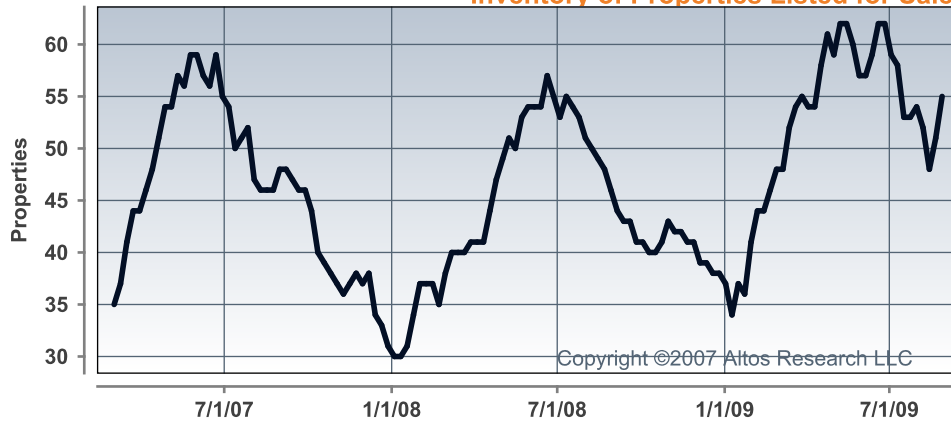

### MARKET ACTION INDEX

The GLENVIEW 60026 is quite strongly in the Buyer's Market zone. The 90-day Market Action Index stands at 10. With several months of inventory available at the current sales rate, buyers should find ample choice.

### MARKET ACTION

Not surprisingly, all quartiles are in the Buyer's Market zone with several months of inventory given the current levels of demand. Watch the quartiles for changes before the overall market shifts.

### DAYS ON MARKET

The properties have been on the market for an average of 214 days. Half of the listings have come newly on the market in the past 126 or so days. Watch the 90-day DOM trend for signals of a changing market.

### DAYS ON MARKET

It is not uncommon for the higher priced homes in an area (Quartiles 1 and 2) to take longer to sell than those in the lower quartiles.

### THIS WEEK

The median single family home price in GLENVIEW 60025 this week is \$599,000.

With inventory trending up but days-on-market trending down and the Market Action Index essentially flat recently, conditions don't seem to have strong up or down pull.

### PRICE

We continue to see prices in this zip code bouncing around this plateau. Look for a persistent up-shift in the Market Action Index before we see prices move from these levels.

### Median Single Family Home Price by Quartile

### PRICE PER QUARTILE

In the quartile market segments, we see prices in this zip code have generally settled at a plateau, although Quartile 1 has been trending a bit downward in recent weeks. We'll need to see a persistent shift in the Market Action Index before we see prices across the board move from these levels.

### Characteristics per Quartile

Quart	Median Price	Med. Sqft	Med. Lot Size	Bed	Bath	Med. Age	Inven.	New	Ab-sorbed	Avg. DoM

### Price per Square Foot

### PRICE AND VALUE

The market plateau is seen across the price and value. The price per square foot and median list price have both been reasonably stagnant. Watch the Market Action Index for persistent changes as a leading indicator before the market moves from these levels.

## INVENTORY

Inventory has been steady around these levels in recent weeks with 445 properties currently available.

## MARKET ACTION INDEX

The GLENVIEW 60025 is quite strongly in the Buyer's Market zone. The 90-day Market Action Index stands at 9. With several months of inventory available at the current sales rate, buyers should find ample choice.

## MARKET ACTION

Not surprisingly, all quartiles are in the Buyer's Market zone with several months of inventory given the current levels of demand. Watch the quartiles for changes before the overall market shifts.

**DAYS ON MARKET**

The properties have been on the market for an average of 252 days. Half of the listings have come newly on the market in the past 203 or so days. Watch the 90-day DOM trend for signals of a changing market.

**DAYS ON MARKET**

It is not uncommon for the higher priced homes in an area (Quartiles 1 and 2) to take longer to sell than those in the lower quartiles.
